

**DOCUMENT RULES DATA STRUCTURE AND  
METHOD OF DOCUMENT PUBLICATION THEREFROM**

**ABSTRACT**

5       A data structure and method of automatically creating a plurality of  
individually customized documents, each for a corresponding one of a plurality of  
individuals. Document components are created and stored. Document, condition  
and action rules governing document assembly are created and stored. Document  
specific data and text specific to individuals is provided with a document request that  
initiates assembly of a document. Each requested document is assembled  
10       automatically in response to the rules and provided data and text.
